

METRO USERS GROUP CONFERENCE REMINDER FOR PUBLISHERS

www.metrousers.com

The Metro Users Group 40th annual conference is being held Feb 24 – 27, 2008 in Costa Mesa CA. The purpose of this working conference is to provide networking and information sharing opportunities for your press personal. The sessions are often described as the most valuable production/maintenance meetings of the year. As an example many web reduction projects were more successful because of discussions among the metro delegates. Also in attendance will be 70 companies that provide innovative products and services to improve your operation and keep you running.

At a time when many travel budgets are being scrutinized in an attempt to reduce expenses do you want to put your press area at risk? Consider the value and importance of keeping your multi-million dollar production center well maintained, productive, and running well into the future. The Metro Users Conference is the longest running, best attended, lowest priced, and most respected user conference in our industry. The \$125 dollar annual membership fee has been eliminated. Consider what the \$175 conference registration fee provides:

- Access to 3 days worth of conference training seminars and equipment sessions
- Access to dozens of Goss International engineers and technicians
- Five meals
- Four evening hosted receptions/buffets
- Complimentary shuttle to and from Orange County airport.

We need your support to keep this conference viable. The low cost of attending the conference can be repaid very quickly with a single new idea. How important is press reliability to your operation?

All conference information is available at our web site. www.metrousers.com
