

38th Annual Metro Users Group Conference Reminder

The Metro Users Group 38th annual conference is being held February 25 through March 1, 2006 in Tucson, Arizona. The Conference will provide the best networking and information gathering opportunity in 2006 to keep your Goss equipment running efficiently and profitably. The success of the Conference depends on participation from all the Metro Users. The low cost of attending the conference can be repaid very quickly with one new idea. Some of the topics that will be discussed and information shared this year are:

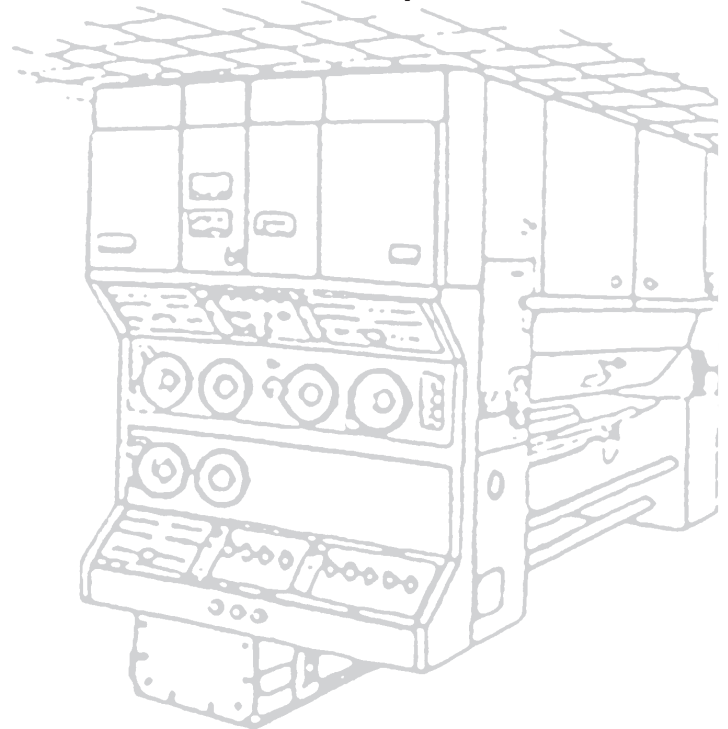

- Lightweight newsprint opportunities.*
- Further web width reductions.*
- How to maintain aging equipment including folders, RTP's, units, and controls.*
- Tech panels on maintenance and quality.*
- Preventative maintenance and tracking programs.*
- Colorliner, Headliner, Metro/Metroliner, Newsliner and Universal breakout sessions.*
- Press chemical relationship Q & A panel.*
- Disaster recovery plans*

Also attending will be 70 different companies displaying their products that support and supply the press and production departments.

We need your support to keep this conference viable in the future. Additional information and registration forms are available on our web page at: www.metrousers.com. Please consider the importance of having your company represented.

*Sincerely,
Metro Users Group Board Members*
